SFA[®] ULTRASONIC DEBLINDING SYSTEM

High Speed Gyration and Ultrasonics From Lab to Production...

**MODEL RVM[®]-15E
SIEVE WITH MOUNTED
SFA[®] ULTRASONIC
DEBLINDING SYSTEM**

MODEL SFA[®]

The VORTI-SIV[®] Division of MM[®] Industries, Inc. has developed a deblinding system utilizing high speed gyration (up to 3450 RPM) and ultrasonic energy. A special alloy transducer probe is mounted to a precision bonded or soldered mesh screen assembly. This 110/220 volt system is available on all VORTI-SIV[®] models ranging from 8" to 36" screen diameters and in stainless woven wire apertures as fine as 20 microns. The SFA[®] system is adaptable on other 18" to 36" separators.
